non-invasive

**MESO-COCKTAILS**

CLOSER LOOK AT THEIR FUNCTIONS  
AND HOW TO USE

**mesoskinline<sup>®</sup> Meso Cocktails**  
deliver outstanding results in  
skin regeneration and rejuvenation.

# Welcome

Welcome to **mesoskinline**, where we proudly offer the best non-invasive cocktail treatments available on the global market.

**Ideal for use with** a variety of skin enhancement tools, including Microneedling, Microlifting, MESOpower pen, Dermapen, RF, and Rollers, among others. This versatility ensures top-notch results across a broad range of skin treatments.

**Our meso cocktails** meet the highest quality standards. This achievement is rooted in our unique blend of resources and a company culture that embraces quality at every stage of production. Our state-of-the-art laboratory is equipped with the latest in compounding, filling, and packaging technologies.

We adhere strictly to **ISO9001 and ISO13485 standards**, incorporating the latest Good Manufacturing Practices (GMP) guidelines to ensure every product undergoes rigorous quality control from start to finish. This meticulous process ensures that our formulations consistently meet their technical specifications, guaranteeing top performance and quality.

As a **globally recognized brand** and thought leader, we boast a distribution network spanning over 50 countries. Our portfolio includes superior meso-cocktails and devices tailored for both non-invasive and invasive mesotherapy, accompanied by comprehensive educational support.

Proudly **produced in the EU** within our own pharmaceutical labs, our over 25 years of experience in R&D, manufacturing, and distribution of medical and aesthetic solutions stand testament to our commitment to innovation and excellence. Our selection process for raw materials meets the stringent requirements for medical devices, ensuring that every product is of the highest standard.

**Our manufacturing processes** are rigorously controlled under ISO 9001 and ISO 13485 quality systems, and every product, including packaging, undergoes thorough testing and inspection post-production. This dedication to quality ensures we continue to provide

high-quality meso-cocktails and devices for non-invasive mesotherapy and education, setting new benchmarks in the industry.

#### **What Distinguishes Us?**

Our ability to deliver swift and enduring results uniquely distinguishes our products in the market.

#### **This exceptional standard**

is the outcome of two decades of dedicated research and development conducted by our laboratories and specialists across Denmark, Germany, and Italy. Through rigorous testing, we have identified unparalleled combinations and balances of active ingredients that provide rapid and optimal outcomes for various specific issues, including deep and fine lines, scars, pigmentation, stretch marks, hair loss, and problems related to loose or dehydrated skin.

#### **Our pursuit of perfection**

led us to a prestigious Italian laboratory, where we further enhanced the effectiveness and synergy of our ingredients. It was here that we developed the Mesoskinline 5 Step Treatment protocol, elevating the results to even greater heights.

MESO COCKTAILS FOR  
THE FACE

MESO COCKTAILS FOR  
NECK AND DÉCOLLETÉ

MESO COCKTAILS FOR  
BODY, STOMACH, HIPS, AND LEGS

MESO COCKTAILS FOR STRETCH MARKS,  
SCARS, AND DEEP WRINKLES

MESO COCKTAILS FOR  
HANDS

MESO COCKTAILS AND PRODUCTS

Aleksandra Kjaersfeldt

**Explore our non-invasive cocktails,  
crafted to fight aging in the face, neck,  
body, scalp, and hands.**

The names of our cocktails are meant to clearly convey their main function, making it simpler to grasp their intended use.

However, they are also formulated to address more treatment areas than what is immediately apparent from their names.

# Explore, **MESO CHEEK LIFT**

## PROFESSIONAL REGENERATION OF CONNECTIVE TISSUE .

### MAIN TREATMENT AREAS

- Face (malar zone as focus area)
- Décolletée
- Body
- Hands

### THIS TREATMENT BENEFITS

- Anti-ageing and skin reconstructing, early signs of ageing
- Rebuilds skin tissue after acne, sunburn, solarium
- Firms the skin especially on the cheek area
- Reduces the length and depth of wrinkles
- Increases the skin's elasticity and stimulates collagen production
- Scar tissue
- Stretch marks
- Partially reduce pigmentation spots

### INGREDIENTS

aqua(water), glycerin, phenoxyethanol, xanthan gum, sodium lactate, pca, sodium pca, arginine, aspartic acid, disodium edta, ethylhexylglycerin, sorbitol, lecithin, citric acid, tocopheryl acetate, phenylalanine, serine, valine, proline, alanine, histidine, glycine, threonine, isoleucine, dipeptide diaminob

### ACTIVE INGREDIENTS

- Sodium PCA
- Vitamin (A-C-E)
- SYN-AKE

### MESO CHEEK LIFT

#### ACTIVATES CELL RECONSTRUCTION

#### ELIMINATE WRINKLES, TIGHTEN SAGGING SKIN, REDUCE SCAR TISSUE, AND DIMINISH STRETCH MARKS.

Facial expression lines, commonly resulting from the usage of about 60 facial muscles in various expressions like frowning, eyebrow lifting, laughing, and grimacing, become increasingly prominent over time. Continuous use of these muscles leads to the formation of permanent, deeper wrinkles, such as forehead lines, laughter lines, and crow's feet.

This trend underscores the growing consumer interest in effective, non-invasive, and safe topical treatments as alternatives to injections.

MESO CHEEK LIFT stands out in this context as a non-invasive mesotherapy option, utilizing the rejuvenating and stimulating capabilities of peptides.

The product's formula includes SYN-AKE, a lightweight synthetic peptide that effectively smooths expression lines through topical application. SYN-AKE's mechanism is inspired by nature, replicating the action of Waglerin-1, a peptide found in the venom of the temple viper (*Tropidolaemus Wagleri*), renowned for its potent muscle-relaxing properties.

#### KEY BENEFITS OF MESO CHEEK LIFT INCLUDE:

- A pronounced 'age-killing' effect against expression lines.
- Noticeable smoothing of deep wrinkles within just one month.
- Facilitates facial relaxation without compromising expressive capabilities.

Furthermore, MESO CHEEK LIFT enriches the skin with vital nourishment, fostering strength and suppleness. This mesotherapy treatment incorporates a blend of the three primary vitamins essential for skin health: A, C, and E, all in highly stable forms to ensure thorough absorption.

Vitamins E and C are particularly beneficial due to their antioxidant properties, shielding the skin from harmful external elements like pollution and UV-A and UV-B radiation, which can accelerate skin aging.

Vitamin A, and Retinol, plays a crucial role in maintaining skin integrity and repairing damaged cells. It is particularly effective for treating chapped, reddened, and irritated skin. Moreover, it helps regulate sebum production, balancing skin's natural oil levels.

SYN-AKE, a cornerstone of the MESO CHEEK LIFT formula, offers targeted action against expression lines, drawing on its ability to mimic Waglerin-1's muscle relaxation effects, making it a key ingredient in combating the visible signs of aging.

# Treatment Protocol

- 1. Remove Makeup and Cleanse Skin:** Begin by removing makeup and cleansing the skin using the Meso Balancing Cleanser. After applying the cleanser, thoroughly rinse the skin with water.
- 2. Prepare Meso-Cocktail:** Get the MESO CHEEK LIFT meso-cocktail ready. Ensure you open a sterile 24-point non-traumatic module for use.
- 3. Apply Meso Pure Peel:** Using circular motions, apply the Meso Pure Peel to the skin, covering all sensitive areas, including the eyes, nose, and lips.
- 4. Perform MESO CHEEK LIFT Treatment:** Proceed with the treatment using MESO CHEEK LIFT.
- 5. Additional step:** Use the microneedling technique with press and lift movements on cheeks, mimic lines, etc., with one of the Metal Meso modules (3-11-36-point) for 5-7 minutes now.
- 6. Apply Meso Anti-Age Mask:** After the MESO CHEEK LIFT treatment, apply the Meso Anti-age Mask. This mask is known for its calming, relieving, disinfecting, anti-aging, and hydrating properties. Place it properly under and above the eye.
- 7. Conclude with Meso Lift and Protect Cream:** Finish the treatment by applying the Meso Lift and Protect Cream. This cream offers anti-aging and healing benefits, along with anti-inflammatory properties and UV50 protection.

## TREATMENT PROGRAM:

- **First 2 months:** once a week
- **Next 2 months:** minimum once a month
- **Maintenance:** once every 3-6 months
- Age 30+: 4-5 treatments
- Age 40+: 6-8 treatments

## TECHNIQUE AND DOSAGE

(For a detailed protocol, see [www.mesoskinline.com](http://www.mesoskinline.com)).

### 1. Speed and Length Settings:

**For General Areas:** Use speed settings 5-6 with the 24-point non-traumatic module for most areas of the face, excluding the eyes and forehead.

**For Sensitive Areas:** Switch to a lower speed setting of 3-4 when treating sensitive areas. This speed adjustment is also recommended when using any microneedling module other than the 24-point non-traumatic module.

### 2. Dosage Instructions:

**Standard Dosage:** Use one 5 ml vial for the entire face and neck area. (Use the entire vial.)

**For Dry Skin or Additional Areas:** If treating dry skin or additional areas such as the hands and décolleté, there may be a need to use an extra vial.

**Post-Treatment Use:** Any remaining product can be taken home by the client for personal use. It can be applied as an active serum before cream for 2-3 days. The product should be kept refrigerated.

**Important Note:** The leftover product from a vial should not be used on another client.

Always ensure that these guidelines are followed precisely for safe and effective treatment. Adjustments should be made based on individual skin types and specific areas being treated.

## EQUIPMENT AND NEEDLE MODULES.

- 1. Machine Selection:** Utilize the Mesopower pen for the procedure.
- 2. Standard Module for All Skin Types:** Always use the 24-point non-traumatic module suitable for all skin types. Employ circular movements during application.
- 3. Additional Modules for Specific Concerns:** For targeted treatment of problem areas such as wrinkles, scars, and sagging skin, choose from additional modules like the 3-point, 11-point, or 36-point microneedling modules. Use a press and lift movement (resembling a tapping motion) when applying these modules.

Remember to adjust the technique based on the specific module being used. The 24-point module is generally suitable for broader application, while the other specified modules are more targeted for specific skin concerns.

Always ensure that the modules are sterile before use and follow any specific guidelines provided with your Mesopower pen for optimal results and safety.

# Explore, **MESO EYE LIFT**

## PROFESSIONAL ANTI-FLACCIDITY TREATMENT.

### MAIN TREATMENT AREAS

- Face
- Around the eyes
- Neck
- Hands
- Especially for thin skin

### THIS TREATMENT BENEFITS

- Anti-ageing, early signs of ageing
- Specially designed for firming area around the eyes
- Reconstructs the face's youthful shape and normal complexion
- Improves stressed skin
- Partially reduces minor wrinkles
- Improves dull, uneven skin (for patients who smoke or who have not cared for their skin)
- Deeper wrinkles (expression lines)
- Moisturising with toning effect
- Firms/lifts the skin and is also compatible with botulinum toxins
- Captures free radicals and protects against external skin damage

### INGREDIENTS

aqua( water), glycerin, methylsilanol mannuronate, dimethylaminoethanol tartrate, niacinamide, phenoxyethanol, sodium lactate, sodium pca, pca, arginine, glucose, xanthan gum, sodium glutamate, sorbitol, aspartic acid, ethylhexylglycerin, disodium edta, urea, glycine, sodium hydroxide, lactic acid, phenylalanine, valine, serine, proline, alanine, isoleucine, threonine, histidine, hydrolyzed wheat protein, panthenol.

### ACTIVE INGREDIENTS

- DMAE,
- Amino acids,
- Multi vitamins (B1, B2, B3, B6),
- Organic Silicium

### MESO EYE LIFT IS THE ULTIMATE SOLUTION FOR PREVENTING SIGNS OF AGING.

#### THIS POWERFUL MESO COCKTAIL IS SCIENTIFICALLY DEVELOPED TO LIFT AND REVITALIZE THE DELICATE SKIN AROUND YOUR EYES.

The meso cocktail contains all the intermediate substances in the Krebs cycle. DMAE and carnosine, both of which are known for their firming and strengthening properties, are the central energy-giving part of aerobic oxidation.

MESO EYE LIFT stimulates and activates the relative enzymatic functions on the mitochondria, which act as the cell's power plant. It removes the barriers that occur in the cell's onset of the lactic acid phase.

**MESO EYE LIFT DELAYS THE SKIN'S AGEING PROCESS** Our skin ages as a result of different internal and external factors. Our genes play an important role, but other parameters such as smoking, diet, UV rays, stress and hormones also have a major effect.

In all instances, ageing damages both the skin cells, molecules and the extracellular matrix. The result is a visible loss of elasticity and firmness of the skin, which becomes wrinkled and loose.

When the body and skin fibroblast ages, there is a drop in the synthesis and in the maintenance of the extracellular matrix.

MESO EYE LIFT slows down this decline by adding the nutrients needed for the fibroblasts to function optimally and to gradually renew.

**FIRMER SKIN WITH NO SIDE EFFECTS** MESO EYE LIFT contains dimethylaminoethanol, or DMAE, which is known to increase the skin's firmness. Another important ingredient is dipeptide carnosine, a derivative of histidine, equally known for its firming properties.

MESO EYE LIFT has no side effects, and the treatment is compatible with other meso cocktails and botulinum toxins. It is therefore both a gentle and effective agent for firmer and stronger skin. The meso cocktail is also negative in doping relationships.

**ORGANIC SILICIUM** Silicium is a natural trace mineral and an essential component of the skin. By interacting with elastic proteins in dermis, such as collagen fibers, elastin and proteoglycans, the Silicium ensures optimal healthy solid skin structure, connective tissue strength and elasticity.

In addition, many studies indicate that silicon is capable of stimulating skin cell metabolism (e.g. collagen production, contractility), strengthens the cartilage, promotes wound healing, and strengthens both skin and mucous membranes.

**DMAE** Several studies have shown that the current use of DMAE can significantly enhance the appearance of the face and its rejuvenation. It has been supplemented with the components that help to correct the development of muscle tissue, aging and fatigue, cellular resuscitation, muscle stimulants, adynamia and muscle fatigue.

# Treatment Protocol

- 1. Remove Makeup and Cleanse Skin:** Begin by removing makeup and cleansing the skin using the Meso Balancing Cleanser. After applying the cleanser, thoroughly rinse the skin with water.
- 2. Prepare Meso-Cocktail:** Get the MESO EYE LIFT meso-cocktail ready. Ensure you open a sterile 24-point non-traumatic module for use.
- 3. Apply Meso Pure Peel:** Using circular motions, apply the Meso Pure Peel to the skin, covering all sensitive areas, including the eyes, nose, and lips.
- 4. Perform MESO EYE LIFT Treatment:** Proceed with the treatment using MESO EYE LIFT.
- 5. Additional step:** Use the microneedling technique with press and lift movements on crow's feet, mimic lines, etc., with one of the Metal Meso modules (3-11-point) for 3-5 minutes now.
- 6. Apply Meso Anti-Age Mask:** After the MESO EYE LIFT treatment, apply the Meso Anti-age Mask. This mask is known for its calming, relieving, disinfecting, anti-aging, and hydrating properties. Place it properly under and above the eye.
- 7. Conclude with Meso Lift and Protect Cream:** Finish the treatment by applying the Meso Lift and Protect Cream. This cream offers anti-aging and healing benefits, along with anti-inflammatory properties and UV50 protection.

## TREATMENT PROGRAM:

- **First 2 months:** once a week
- **Next 2 months:** minimum once a month
- **Maintenance:** once every 6 months
- Age 30+: 4-6 treatments
- Age 40+: 6-8 treatments

## TECHNIQUE AND DOSAGE

(For a detailed protocol, see [www.mesoskinline.com](http://www.mesoskinline.com)).

### 1. Speed and Length Settings:

**For General Areas:** Use speed settings 5-6 with the 24-point non-traumatic module for most areas of the face, excluding the eyes and forehead.

**For Sensitive Areas:** If treating dry skin or additional areas such as the hands and décolleté, there may be a need to use an extra vial.

# Explore, **MESO NECK & DÉCOLLETÉE LIFT**

## PROFESSIONAL SOLUTION FOR VISIBLY SMOOTHING AND TONING TO REDUCE SKIN AGING

### MAIN TREATMENT AREAS

- Decolletee
- Neck
- Face
- Body

### THIS TREATMENT BENEFITS

- Firms the skin on the neck and décolleté
- Anti-ageing, early signs of ageing
- Reduces the length and depth of wrinkles
- Prevents and reduces wrinkles or stretch marks

### INGREDIENTS

aqua, glycerin, methylsilanol mannuronate, dimethylaminoethanol tartrate, phenoxyethanol, propylene glycol, xanthan gum, hydrolyzed elastin, pentylene glycol, disodium edta, ethylhexylglycerin, sodium hydroxide

### ACTIVE INGREDIENTS

- DMAE  
(a key antioxidant that strengthens fibroblasts and thus firms the skin)
- Elastin  
(a protein that helps the skin return to its original position)
- Organic silicium  
(Methylsilanol Mannuronate is an organic derivative of seaweed that binds moisture into the epidermis and therefore strengthens the skin)

### MESO EYE LIFT IS THE ULTIMATE SOLUTION FOR PREVENTING SIGNS OF AGING.

#### **THIS POWERFUL MESO COCKTAIL IS SCIENTIFICALLY DEVELOPED TO LIFT AND REVITALIZE THE DELICATE SKIN AROUND YOUR EYES.**

The meso cocktail contains all the intermediate substances in the Krebs cycle. DMAE and carnosine, both of which are known for their firming and strengthening properties, are the central energy-giving part of aerobic oxidation.

MESO EYE LIFT stimulates and activates the relative enzymatic functions on the mitochondria, which act as the cell's power plant. It removes the barriers that occur in the cell's onset of the lactic acid phase.

**MESO EYE LIFT DELAYS THE SKIN'S AGEING PROCESS** Our skin ages as a result of different internal and external factors. Our genes play an important role, but other parameters such as smoking, diet, UV rays, stress and hormones also have a major effect.

# Explore, **MESO FRESH VITAMIN**

## PROFESSIONAL ANTIOXIDANT EFFECT AND SOLUTION TO REVIVE THE SKIN

### MAIN TREATMENT AREAS

- Face
- Décolletée
- Neck
- Hands

### THIS TREATMENT BENEFITS

- Anti-aging
- Improves stressed skin
- Partially reduces minor wrinkles
- Improves dull, uneven skin (for patients who smoke or have not taken care of their skin)
- Deeper wrinkles (facial lines)
- Around the eye area
- Moisturizing with toning effect

### INGREDIENTS

aqua(water), glycerin, panthenol, phenoxyethanol, calcium gluconate, magnesium gluconate, potassium gluconate, xanthan gum, sodium lactate, sodium pca, pca, arginine, sodium hyaluronate, aspartic acid, sorbitol, disodium edta, ethylhexylglycerin, lecithin, tocopheryl acetate, citric acid, phenylalanine, isoleucine, histidine, serine, alanine, glycine, valine, threonine, proline, glyceryl linolenate, glyceryl linoleate, retinyl palmitate, sodium ascorbyl phosphate, potassium sorbate.

### ACTIVE INGREDIENTS

- Calcium Gluconate
- Magnesium Gluconate
- Potassium Gluconate
- Sodium PCA (NMF)
- Hyaluronic Acid, Amino acids
- Multivitamins

### REVIVE THE SKIN WITH MESO FRESH VITAMIN

#### FAST, VISIBLE RESULTS

MESO FRESH VITAMIN is an important product within mesotherapy that stimulates and revives tired skin. The product is a good choice for treating dehydration, wrinkles and sun damage. Treating with MESO FRESH VITAMIN helps achieve a good level of cellular hydration and good biochemical and biological architecture.

Thanks to the content of hyaluronic acid, it is also recommended for use around e.g. the eye area, which will lead to significant improvement after just 1-2 treatments.

MESO FRESH VITAMIN consists of natural substances of a high quality, which are therefore easily absorbed by the skin. This gives fast, visible results.

MESO FRESH VITAMIN is gentle and is often used together with other treatments. The product does not prevent ageing, but delays the process significantly.

Through treatment, the skin gains a fresh and youthful glow, which is already visible after the first treatment. MESO FRESH VITAMIN is rejuvenating wellbeing at its best.

The treatment is a targeted health boost for the skin, and with its wrinkle-reducing properties, the product is also well suited to patients who smoke and who have not followed a skincare regime.

**REDUCE AND REMOVE WRINKLES WITH MESO FRESH VITAMIN** Just like several other mesoskinline products for professional treatments, MESO FRESH VITAMIN contains hyaluronic acid, which is produced naturally in the body and is found in tissue and body fluids in all human beings. The molecule has a unique ability to bind large quantities of moisture in the skin.

Hyaluronic acid's hydrating properties are particularly beneficial for wrinkle reduction. For minor wrinkles, such as around the eyes, a single MESO FRESH VITAMIN treatment is sufficient, while deeper wrinkles need repeated treatments.

#### GENTLE AND EFFECTIVE

MESO FRESH VITAMIN is both gentle and effective and is suitable for multiple skin types, damage and signs of ageing, and the treatment improves both collagen fibres and micro-circulation in the skin.

The result is a firmer and a more supple skin that radiates health. The product has no side effects, allowing you to treat larger areas simultaneously without any discomfort.

The ingredients contained in MESOskinline products are all approved remedies, which have been selected in accordance with general medical practice. They are packed in clinical conditions in practical vials and disposable ampoules to avoid waste or oxidation.

The products are ready to use and thereby quick and easy to apply in a busy working day. MESO FRESH VITAMIN is not recommended for pregnant women, patients with acne or severe skin problems.

# Treatment Protocol

**1. Remove Makeup and Cleanse Skin:** Begin by removing makeup and cleansing the skin using the Meso Balancing Cleanser. After applying the cleanser, thoroughly rinse the skin with water.

**2. Prepare Meso-Cocktail:** Get the MESO FRESH VITAMIN meso-cocktail ready. Ensure you open a sterile 24-point non-traumatic module for use.

**3. Apply Meso Pure Peel:** Using circular motions, apply the Meso Pure Peel to the skin, covering all sensitive areas, including the eyes, nose, and lips.

**4. Perform MESO NECK & DÉCOLLETÉE LIFT Treatment:** Proceed with the treatment using MESO FRESH VITAMIN..

**5. Apply Meso Anti-Age Mask:** After the MESO FRESH VITAMIN treatment, apply the Meso Anti-age Mask. This mask is known for its calming, relieving, disinfecting, anti-aging, and hydrating properties. Place it properly under and above the eye.

**6. Conclude with Meso Lift and Protect Cream:** Finish the treatment by applying the Meso Lift and Protect Cream. This cream offers anti-aging and healing benefits, along with anti-inflammatory properties and UV50 protection.

## TREATMENT PROGRAM:

- **First 2 months:** once a week
- **Next 2 months:** once a month
- **Maintenance:** once every 6 months

Age 30+: 4-6 treatments  
Age 40+: 6-8 treatments

## TECHNIQUE AND DOSAGE

(For a detailed protocol, see [www.mesoskinline.com](http://www.mesoskinline.com)).

### 1. Speed and Length Settings:

**For General Areas:** Use speed settings 5-6 with the 24-point non-traumatic module for most areas of the face, excluding the eyes and forehead. Length 0,75-1 (on the handle).

**For Sensitive Areas:** Switch to a lower speed setting of 3-4 when treating sensitive areas. This speed adjustment is also recommended when using any microneedling module other than the 24-point non-traumatic module. Length 0,5-1 (on the handle).

### 2. Dosage Instructions:

**Standard Dosage:** Use one 5 ml vial for the entire face and neck area. (Use the entire vial)

**For Dry Skin or Additional Areas:** If treating dry skin or additional areas such as the hands and décolleté, there may be a need to use an extra vial.

**Post-Treatment Use:** Any remaining product can be taken home by the client for personal use. It can be applied as an active serum before cream for 2-3 days. The product should be kept refrigerated.

**Important Note:** The leftover product from a vial should not be used on another client.

3.

Always ensure that these guidelines are followed precisely for safe and effective treatment. Adjustments should be made based on individual skin types and specific areas being treated.

## EQUIPMENT AND NEEDLE MODULES.

**1. Machine Selection:** Utilize the Mesopower pen for the procedure.

**2. Standard Module for All Skin Types:** Always use the 24-point non-traumatic module suitable for all skin types. Employ circular movements during application.

**3. Additional Modules for Specific Concerns:** For targeted treatment of problem areas such as wrinkles, scars, and sagging skin, choose from additional modules like the 3-point, 11-point, or 36-point microneedling modules. Use a press and lift movement (resembling a tapping motion) when applying these modules.

Remember to adjust the technique based on the specific module being used. The 24-point module is generally suitable for broader application, while the other specified modules are more targeted for specific skin concerns.

Always ensure that the modules are sterile before use and follow any specific guidelines provided with your Mesopower pen for optimal results and safety.

# Explore, **MESO** **HAIR LOSS CONTROL** EFFECTIVE EIGHT-STAGE PROFESSIONAL TREATMENT SOLUTION

## MAIN TREATMENT AREAS

- Scalp (Hair)
- Beard
- Eyebrows

## THIS TREATMENT BENEFITS

- Halts hair loss.
- Promotes universal hair growth.
- Shields hair during stress or medication.
- Influences 5-reductase inhibitors
- Balances sebum production.
- Feeds hair roots.
- Thickens strands.
- Restores cuticles.
- Strengthens medulla.
- Adds gloss.
- Delays inherited hair loss.
- Reactivates follicles post-pregnancy, stress, or sleep issues.

## INGREDIENTS

aqua (water), alcohol, glycerin, propylene glycol, peg-40 hydrogenated castor oil, hydrolyzed soy protein, phenoxyethanol, serenoa serrulata (saw palmetto) fruit extract, menthyl nicotinate, centella asiatica extract, menthol, propanediol, sodium lactate, pca, sodium pca, zinc pca, polyquaternium-11, panthenol, glucose, arginine, triethanolamine, disodium edta, ethylhexylglycerin, aspartic acid, panax ginseng root extract, pyridoxine, ornithine hcl, allium cepa (onion) bulb extract, arginine hcl, glucosamine hcl, citrulline, niacinamide, phenylalanine, valine, threonine, histidine, proline, isoleucine, alanine, serine, glycine, biotin

## ACTIVE INGREDIENTS

- Saw palmetto
- Panthenol
- PCA
- Ginseng Extract
- Amino acids
- Hydrolyzed Soy Protein
- Allum Cepa bulb extract
- Biotin

## MESO HAIR LOSS CONTROL AGENT AGAINST HAIR LOSS

### PROMOTES HAIR GROWTH AND REDUCES OR STOPS HAIR LOSS

MESO HAIR LOSS CONTROL distinguishes itself as a remarkably comprehensive and effective choice for anyone seeking a solution to hair loss, thanks to its array of unique features. This makes it an exceptionally compelling option in the market for effective hair loss treatments.

MESOSKINLINES MESO HAIR LOSS CONTROL effectively reduces hair loss, stimulates new hair growth, improves scalp health, strengthens and thickens hair, and maintains long-term hair and scalp health.

MESO HAIR LOSS CONTROL is a highly effective solution for combating hair loss and promoting hair regrowth. This advanced treatment enhances scalp circulation and oxygenation.

The formulation of MESO HAIR LOSS CONTROL is meticulously engineered, containing a precise blend of vitamins, amino acids, and minerals crucial for harnessing the body's metabolic processes to their fullest potential. A key feature of MESO HAIR LOSS CONTROL is its ability to ensure sustained bioavailability, thereby maximizing the synthesis of keratin proteins. This treatment delivers the essential amino acid composition necessary for robust hair health, making it a vital element in anti-hair loss regimens.

### PROMOTES HAIR GROWTH AND REDUCES OR STOPS HAIR LOSS IN EIGHT STEPS.

MESO HAIR LOSS CONTROL employs a comprehensive and systematic approach to combat hair loss, utilizing a unique eight-stage process. This methodical strategy distinguishes it from other treatments, which typically cover fewer aspects of hair health.

- 1. Scalp Preparation and Detoxification:** The treatment begins with cleansing and preparing the scalp, removing build-up and toxins that can impede hair growth.
- 2. Enhancing Blood Circulation:** Improved blood flow to the scalp is crucial. This stage focuses on increasing circulation, which is essential for nourishing hair follicles and promoting healthy hair growth.
- 3. Nutrient Delivery:** The scalp is infused with a blend of essential nutrients, vitamins, and minerals specifically formulated to strengthen hair follicles and promote hair health.
- 4. Stimulation of Hair Follicles:** Using targeted treatments, dormant hair follicles are stimulated, encouraging the growth of new hair.
- 5. Keratin Production Optimization:** This stage focuses on enhancing the production of keratin, a key protein that makes up hair, to strengthen existing hair and encourage the growth of new, healthy strands.
- 6. Regulation of Sebum Production:** By regulating sebum production in the scalp, this stage helps maintain a balanced environment that is conducive to hair growth and prevents follicle blockage.
- 7. Dandruff and Scalp Health Management:** Addressing issues like dandruff and scalp irritation, this stage ensures a healthy scalp environment, which is fundamental for healthy hair growth.
- 8. Ongoing Protection and Maintenance:** The final stage involves treatments and recommendations for ongoing scalp and hair care, ensuring lasting results and continuous protection against hair loss.

*By addressing hair loss through these eight distinct but interconnected stages, MESO HAIR LOSS CONTROL offers a thorough and effective solution for those seeking to reduce or stop hair loss.*

# Treatment Protocol

- 1. Prepare Meso-Cocktail:** Get the MESO HAIR LOSS CONTROL meso-cocktail ready. Ensure you open a sterile 24-point non-traumatic module for use.
- 2. Apply Meso Pure Peel:** Using circular motions, apply the Meso Pure Peel to the scalp.
- 3. Perform MESO HAIR LOSS CONTROL Treatment:** Proceed with the treatment using MESO HAIR LOSS CONTROL. Massage the rest of the product in for 2-3 minutes after the treatment to increase blood flow.

## TREATMENT PROGRAM:

- **First 2 months:** once a week
- **Next 2 -3 months:** once a month
- **Maintenance:** once every 2-3 months

## AFTERCARE AND MAINTAINANCE

### General aftercare:

#### During the 4-Month Hair Growth Treatment Course:

1. Apply Tricocure serum once daily by gently massaging a small amount into the scalp.
2. Take 2 tablets of HS supplement daily.
3. Use Tricocure shampoo (blue) 1-2 times a week.

#### After Completing the Treatment Course:

- Continue taking the HS supplement for 1 month, 3-4 times a year.
- Use Tricocure Serum 2-3 times a week for ongoing care.

#### For Clients with Sensitive Scalp, Dandruff, or Psoriasis:

Tricocure shampoo is highly recommended. Allow the shampoo to act until it feels cooling (about 3-4 minutes) before rinsing off.

This helps hydrate the scalp, remove dead cells and dandruff, and provides a calming action throughout the night.

## TECHNIQUE AND DOSAGE

(For a detailed protocol, see [www.mesoskinline.com](http://www.mesoskinline.com)).

### 1. Speed and Length Settings:

**For General Areas:** Use speed settings 5-6 with the 24-point non-traumatic module.

### 2. Dosage Instructions:

**Standard Dosage:** Use one 5 ml vial for the entire scalp. (Use the entire vial.)

**Post-Treatment Use:** Any remaining product can be taken home by the client for personal use. It can be applied as an active serum before cream for 2-3 days. The product should be kept refrigerated.

**Important Note:** The leftover product from a vial should not be used on another client.

Always ensure that these guidelines are followed precisely for safe and effective treatment.

Adjustments should be made based on individual skin types and specific areas being treated.

## EQUIPMENT AND NEEDLE MODULES.

- 1. Machine Selection:** Utilize the Mesopower pen for the procedure.
- 2. Standard Module:** Always use the 24-point non-traumatic module suitable for the scalp.. Employ circular movements during application.

Remember to adjust the technique based on the specific module being used. The 24-point module is generally suitable for broader application, while the other specified modules are more targeted for specific skin concerns.

Always ensure that the modules are sterile before use and follow any specific guidelines provided with your Mesopower pen for optimal results and safety.

# Explore, **MESO STRETCH MARK REMOVER**

## REGENERATION AND COLLAGEN BOOSTING FOR STRETCH MARKS, SCARS, AND DEEP WRINKLES

### MAIN TREATMENT AREAS

- Stretch marks
- Scars
- Deep wrinkles

### THIS TREATMENT BENEFITS

- Significant reduction of white and red stretch marks
- Reduction of dyschromia and width of the stretch mark
- Collagenase activity on denatured collagen
- Peptide activity on increasing collagen and elastin biosynthesis
- Provides a structural support network of fibronectin
- Ideal for preventing stretch marks during pregnancy or weight loss!

### INGREDIENTS

aqua (water), glycerin, maris aqua, methylsilanol mannuronate, hydrolyzed collagen, glucosamine sulfate, phenoxyethanol, xanthan gum, sodium chondroitin sulfate, dimethyl sulfone, disodium edta, ethylhexylglycerin, chlorella vulgaris extract, pentylene glycol

### ACTIVE INGREDIENTS

- Collagen
- Organic sillicium
- Marine plasma
- Chlorella Vulgaris extract
- Contains several active ingredients that, according to clinical studies, prevent and repair stretch marks by increasing the collagen and elastin formation.

### REDUCES STRETCH MARKS WITH MESO STRETCH MARK REMOVER

#### REGENERATES THE SKIN AND EFFECTIVELY REDUCES STRETCH MARKS, BOTH WHITE AND RED

Both men and women can develop stretch marks on various parts of their bodies. Stretch marks occur when the skin is stretched or contracted too rapidly, such as during pregnancy, weight gain, weight loss, or muscle building.

Overstretching the skin can damage the subdermal collagen, as can injury and dehydration of the elastin fiber matrix. This can result in visible marks or scars commonly known as stretch marks. Treatment with MESO STRETCH MARK REMOVER can help prevent and diminish stretch marks.

MESO STRETCH MARK REMOVER contains active ingredients that, according to clinical studies, can prevent and reduce stretch marks by stimulating collagen and elastin production, thereby strengthening the collagen matrix.

#### STIMULATES THE PRODUCTION OF COLLAGEN IN THE SKIN.

Collagen, a protein that constitutes approximately 25% of the protein composition in the human body, plays a crucial role in maintaining the skin's healthy and firm appearance. It provides elasticity and replaces dead skin cells, contributing to the skin's youthful look.

As we age, the production of collagen in the skin naturally decreases, affecting its resilience and causing sagging. This reduction in collagen also leads to the formation of fine lines around the eyes and wrinkles between the brows.

The MESO STRETCH MARK REMOVER treatment addresses stretch marks by stimulating the skin's natural regenerative processes and boosting collagen production.

MESO STRETCH MARK REMOVER harnesses the skin's innate regenerative abilities to eliminate stretch marks. By rejuvenating the skin from within, MESO STRETCH MARK REMOVER is effective in both preventing and reducing the appearance of stretch marks.

The treatment enhances the production of elastin and collagen by ensuring a continuous supply of these proteins. Lysyl oxidase enzymes play a crucial role in increasing the network between the fibers, while silicon aids in structuring and organizing the fibers into a well-coordinated three-dimensional network.

Chondroitin sulfate is an important glycosaminoglycan, and although it exists in small quantities within the extracellular matrix, it significantly influences the condition of the skin. Chondroitin sulfate plays a vital role in a two-part process that maintains skin hydration and increases hyaluronic acid levels. Hyaluronic acid has the ability to retain water in the skin, contributing to a plump and fresh appearance, thereby promoting overall skin health.

- HYDROLYZED COLLAGEN REJUVENATES THE TISSUE.
- EFFECTIVELY REDUCE STRETCH MARKS WITHOUT ANY SIDE EFFECTS

# Treatment Protocol

- 1. Preparation of the Area:** Cleanse the area with Meso Pure Peel. Apply it in circular movements for 1-2 minutes. This step prepares the skin for treatment.
- 2. Anesthetic (Optional):** Initially, no anesthetic is required. However, if needed, 5% lidocaine can be applied later during the treatment.
- 3. Treatment Application:** Use a sterile 36-point MAXI MODULE. Apply it at least 7-10 times per stretch mark and 5-7 times between stretch marks. This process improves the elasticity of the entire tissue, not just the critical areas. Expect visible redness and pinpoint bleeding.
- 4. Adjusting Treatment for Skin Types:** For less sensitive skin or areas with insufficient reaction, revisit the same spots several times during the treatment and repeat the technique.
- 5. Cleaning and Application During Treatment:** If blood appears, wipe it off using Meso Pure Peel. Then, apply more Meso Stretch Mark Remover on the irritated skin using circular fingertip movements.
- 6. Final Application:** Finish by applying a thick layer of Meso Lift and Protect to the treated area. Allow it to absorb for 3-5 minutes. Massage the area gently with more Lift and Protect, if necessary.

## TREATMENT PROGRAM:

- **First 2 months:** once a week/10 days
- **Next 2 -3 months:** minimum once a month

## TECHNIQUE AND DOSAGE

(For a detailed protocol, see [www.mesoskinline.com](http://www.mesoskinline.com)).

- 1. Speed and Length Settings:**  
**Speed 5-6/ length 1 (all areas)**
- 2. Dosage Instructions:**  
**Standard Dosage:** Use one 5 ml vial for the area of 15x15 cm

**Important Note:** The leftover product from a vial should not be used on another client.

Always ensure that these guidelines are followed precisely for safe and effective treatment.

Adjustments should be made based on individual skin types and specific areas being treated.

## EQUIPMENT AND NEEDLE MODULES.

- 1. Machine Selection:** Utilize the Mesopower pen for the procedure.
- 2. Standard Module:**  
**MESO 36-POINT MAXI MODULE**
  - Speed 5-6/ length 1 (all areas)
  - \*We recommend adjusting ALL parameters up and down depending on skin sensitivity
  - can be used for scars or wrinkles due to strong skin repair effect of marine plasma and collagen (Press and Lift Technique)

## MESO EYE LIFT - INGREDIENTS

**Sorbitol:** A sugar alcohol that acts as a humectant, helping the skin to retain moisture.  
**Aspartic Acid:** An amino acid that can aid in the regeneration of skin cells.  
**Ethylhexylglycerin:** A conditioning agent and preservative.  
**Sodium EDTA:** Used to bind metal ions and prevent them from affecting the product's stability and appearance.  
**Urea:** Enhances the skin's capacity to retain moisture and has exfoliating properties.  
**Glycine:** An amino acid that plays a role in skin repair and regeneration.  
**Sodium Hydroxide:** Used to balance the pH of the product.  
**Lactic Acid:** An alpha hydroxy acid (AHA) that helps with skin renewal and exfoliation.  
**Phenylalanine, Valine, Serine, Proline, Alanine, Isoleucine, Threonine, Histidine:** Essential amino acids that help to build proteins in the skin, aiding in repair and rejuvenation.  
**Hydrolyzed Wheat Protein:** Provides amino acids and peptides that can help nourish and firm the skin.  
**Panthenol (Pro-Vitamin B5):** Known for its skin-soothing and moisturizing properties, and can improve skin's elasticity and hydration.

**Aqua (Water):** The primary base for most cosmetic products, helps in dissolving other ingredients and provides hydration to the skin.  
**Glycerin:** A humectant that attracts moisture to the skin, keeping it hydrated, soft, and supple.  
**Methylsilanol Mannuronate:** An organic derivative of seaweed that can help firm and tone the skin, also known for its anti-aging properties.  
**Dimethylaminoethanol Tartrate (DMAE):** Believed to have anti-aging benefits by promoting muscle tone and firmness in the skin.  
**Niacinamide (Vitamin B3):** Helps improve the appearance of enlarged pores, uneven skin tone, fine lines, and dullness.  
**Phenoxyethanol:** Used as a preservative to prevent the growth of bacteria and extend the product's shelf life.  
**Sodium Lactate:** A natural moisturizer and humectant that is also used to regulate the pH of the product.  
**Sodium PCA, PCA:** Natural moisturizing factors that help maintain the skin's hydration balance.  
**Arginine:** An amino acid that acts as an antioxidant and can help repair visible skin damage.  
**Glucose:** Serves as an energy source for skin cells and can have moisturizing and conditioning effects.  
**Xanthan Gum:** A thickening agent that helps stabilize and give texture to the product.  
**Sodium Glutamate:** Helps maintain the skin's moisture balance and may have antioxidant properties.  
Each of these ingredients serves specific functions and contributes to the overall effectiveness of the product.

## MESO CHEEK LIFT - INGREDIENTS

**AMINO ACIDS (PHENYLALANINE, SERINE, VALINE, PROLINE, ALANINE, HISTIDINE, GLYCINE, THREONINE, ISOLEUCINE):** These build proteins in the skin and help maintain its texture and resilience.  
**DIPEPTIDE DIAMINOBTUROYL BENZYLAMIDE DIACETATE:** A peptide that can help reduce the appearance of expression lines.  
**GLYCERYL LINOLEATE & GLYCERYL LINOLENATE:** Essential fatty acids that help to maintain the skin's barrier and retain moisture.  
**SODIUM ASCORBYL PHOSPHATE:** A stable form of Vitamin C, an antioxidant that can brighten skin and diminish the appearance of fine lines.  
**RETINYL PALMITATE:** A gentler form of Vitamin A that can help in the reduction of wrinkles and support skin renewal.  
**POTASSIUM SORBATE:** A preservative that ensures the product remains free of potentially harmful microorganisms.  
**This carefully crafted blend of ingredients is designed to hydrate, protect, and rejuvenate the skin, providing a comprehensive approach to skincare.**

**AQUA (WATER):** The foundation of most skincare products; hydrates the skin.  
**GLYCERIN:** A humectant that draws moisture into the skin, keeping it hydrated and supple.  
**PHENOXYETHANOL:** Used as a preservative; it helps prevent the growth of microbes in the product.  
**XANTHAN GUM:** A stabilizer and thickening agent; improves texture and allows for smooth application.  
**SODIUM LACTATE:** A natural moisturizer and pH regulator; it can also help to reduce the appearance of fine lines and wrinkles.  
**PCA & SODIUM PCA:** Natural moisturizing factors that help keep the skin's surface soft and hydrated.  
**ARGININE:** An amino acid that acts as an antioxidant and plays a role in repairing visible skin damage.  
**ASPARTIC ACID:** An amino acid that aids in maintaining skin's hydration and elasticity.  
**DISODIUM EDTA:** Helps to prevent impurities in the water from causing product instability.  
**ETHYLHEXYLGLYCERIN:** A conditioning agent and preservative that also provides moisturizing benefits.  
**SORBITOL:** Another humectant that helps the skin retain moisture and improves texture.  
**LECITHIN:** An emollient that can restore hydration and create a smooth, soft skin surface.  
**CITRIC ACID:** An AHA that can gently exfoliate the skin to renew its surface.  
**TOCOPHERYL ACETATE:** A form of Vitamin E, an antioxidant that protects the skin from free radicals and supports skin healing.

## MESO FRESH VITAMIN - INGREDIENTS

**Aqua (Water):** The primary base for most cosmetic products, helps in dissolving other ingredients and provides hydration to the skin.  
**Glycerin:** A humectant that attracts moisture to the skin, keeping it hydrated, soft, and supple.  
**Panthenol (Pro-Vitamin B5):** Known for its skin-soothing and moisturizing properties. It can also help improve skin's elasticity and hydration.  
**Phenoxyethanol:** Used as a preservative to prevent the growth of bacteria and extend the product's shelf life.  
**Calcium Gluconate, Magnesium Gluconate, Potassium Gluconate:** These are mineral salts often used for their skin-conditioning properties.  
**Xanthan Gum:** A thickening agent that helps stabilize and give texture to the product.  
**Sodium Lactate, Sodium PCA, PCA:** These are natural moisturizing factors that help maintain the skin's hydration balance.  
**Arginine:** An amino acid that acts as an antioxidant and can help repair visible skin damage.  
**Sodium Hyaluronate:** A form of hyaluronic acid that helps retain skin moisture, leading to smoother, softer skin with decreased wrinkles and an overall fuller appearance.

**Orbitol:** A humectant that helps retain moisture and improves the texture of the product.  
**Disodium EDTA:** Used to bind metal ions and prevent them from affecting the product's stability and appearance.  
**Ethylhexylglycerin:** A conditioning agent and preservative.  
**Lecithin:** Used as an emollient and water-binding agent.  
**Tocopheryl Acetate (Vitamin E):** An antioxidant that helps protect skin from damage caused by free radicals.  
**Citric Acid:** Used to adjust the pH of the product and also has mild exfoliating properties.  
**Amino Acids (e.g., Phenylalanine, Isoleucine, Histidine, Serine, Alanine, Glycine, Valine, Threonine, Proline):** Help to nourish and rejuvenate the skin.  
**Glyceryl Linoleate, Glyceryl Linolenate:** Essential fatty acids that help maintain the skin's barrier and prevent moisture loss.  
**Retinyl Palmitate:** A form of vitamin A that can help reduce the appearance of fine lines and wrinkles.  
**Sodium Ascorbyl Phosphate:** A stable form of vitamin C, an antioxidant that can help brighten skin and reduce signs of aging.  
**Potassium Sorbate:** A preservative used to prevent mold and yeast growth.  
Each of these ingredients serves specific functions and contributes to the overall effectiveness of the skincare product.

## MESO NECK & DÉCOLLETÉE LIFT - INGREDIENTS

**AQUA:** Aqua is water, which serves as the primary base and solvent for the product.

**GLYCERIN:** Glycerin is a humectant that attracts and retains moisture, providing hydration to the skin.

**METHYLSILANOL MANNURONATE:** This compound is derived from silanol and mannuronic acid and is used in skincare for potential skin-conditioning properties.

**DIMETHYLAMINOETHANOL TARTRATE (DMAE):** DMAE is an organic compound with potential antioxidant properties. When applied to the skin, it may stimulate muscle contractions, contributing to a firming effect.

**PHENOXYETHANOL:** Phenoxyethanol is a preservative commonly used in cosmetics and skincare products to prevent the growth of bacteria and other microorganisms, extending the product's shelf life.

**PROPYLENE GLYCOL:** Propylene glycol is a synthetic compound used for its humectant and skin-conditioning properties, helping to maintain skin hydration.

**XANTHAN GUM:** Xanthan gum is a thickening agent and stabilizer that gives the product a consistent texture and viscosity.

**HYDROLYZED ELASTIN:** Hydrolyzed elastin is elastin that has been broken down into smaller fragments, making it easier for the skin to absorb. It can improve skin elasticity and moisture retention.

**PENTYLENE GLYCOL:** Pentylene glycol is a synthetic compound commonly used as a skin-conditioning agent and can have hydrating properties.

**DISODIUM EDTA:** Disodium EDTA is a chelating agent that helps stabilize cosmetic formulations by binding to metal ions, preventing undesirable interactions between ingredients.

**ETHYLHEXYLGLYCERIN:** Ethylhexylglycerin is a synthetic compound often used as a skin-conditioning agent and preservative, ensuring product quality and safety.

**SODIUM HYDROXIDE:** Sodium hydroxide is a chemical compound used for pH adjustment in skincare products, helping to maintain the product's pH level.

These ingredients are included in the cocktail to provide specific benefits such as hydration, skin conditioning, preservation, and potential improvement in skin health.

## MESO STRETCH MARK REMOVER - INGREDIENTS

**AQUA (WATER):** Water is the primary solvent used as the base for the product, providing a medium for other ingredients.

**GLYCERIN:** Glycerin is a humectant that helps to attract and retain moisture in the skin, thereby providing hydration.

**MARIS AQUA:** Maris Aqua refers to seawater, which may contain minerals and nutrients beneficial for the skin.

**METHYLSILANOL MANNURONATE:** This compound is used in skincare for potential skin conditioning properties.

**HYDROLYZED COLLAGEN:** Hydrolyzed collagen is collagen that has been broken down into smaller, more easily absorbed fragments. It can improve skin elasticity and hydration.

**GLUCOSAMINE SULFATE:** Glucosamine sulfate is believed to have potential benefits for skin health.

**PHENOXYETHANOL:** Phenoxyethanol is a preservative commonly used in cosmetics and skincare products to prevent the growth of bacteria and other microorganisms.

**XANTHAN GUM:** Xanthan gum is a thickening agent and stabilizer used to give the product a consistent texture.

**SODIUM CHONDROITIN SULFATE:** Sodium chondroitin sulfate may have potential benefits for skin health.

**DIMETHYL SULFONE:** Dimethyl sulfone is an organic sulfur compound that is sometimes used in skincare for its potential skin-related benefits.

**DISODIUM EDTA:** Disodium EDTA is a chelating agent that helps to stabilize cosmetic formulations by binding to metal ions.

**ETHYLHEXYLGLYCERIN:** Ethylhexylglycerin is a synthetic compound often used as a skin conditioning agent and preservative.

**CHLORELLA VULGARIS EXTRACT:** Chlorella vulgaris extract is derived from a type of algae and may have potential benefits for the skin.

**PENTYLENE GLYCOL:** Pentylene glycol is a synthetic compound commonly used as a skin conditioning agent.

These ingredients are to provide specific benefits such as hydration, skin conditioning, preservation, and potential improvement in skin health.

## MESO HAIR LOSS CONTROL - INGREDIENTS

**Aqua (Water), Alcohol, Glycerin, Propylene Glycol:** These are common solvents and humectants, providing the base of the product and helping to retain moisture in the hair and scalp.

**PEG-40 Hydrogenated Castor Oil:** Acts as an emulsifier, helping to mix oil and water-based ingredients and enhance the texture of the product.

**Hydrolyzed Soy Protein:** Strengthens and repairs hair fibers, improving hair texture and resilience.

**Phenoxyethanol:** A preservative to keep the product stable and extend its shelf life.

**Saw Palmetto (Serenoa Serrulata) Fruit Extract:** Known for its ability to potentially slow hair loss and stimulate hair growth.

**Methyl Nicotinate:** Enhances skin microcirculation, potentially increasing nutrient flow to hair follicles.

**Centella Asiatica Extract:** Promotes collagen production and improves blood circulation in the scalp.

**Menthol:** Provides a cooling sensation and helps improve blood flow to the scalp.

**Propanediol, Sodium Lactate, PCA, Sodium PCA, Zinc PCA:** These are moisturizing agents that help maintain the hydration of the scalp and hair.

**Polyquaternium-11:** A conditioning agent that smoothens and softens hair.

**Panthenol (Pro-Vitamin B5):** Strengthens hair, retains moisture, and improves the texture of damaged hair.

**Glucose, Arginine:** Provide nutrients and support to hair follicles, encouraging healthy hair growth.

**Triethanolamine, Disodium EDTA:** These ingredients adjust the pH of the product and help in stabilizing the formula.

**Ethylhexylglycerin:** A skin conditioner and preservative.

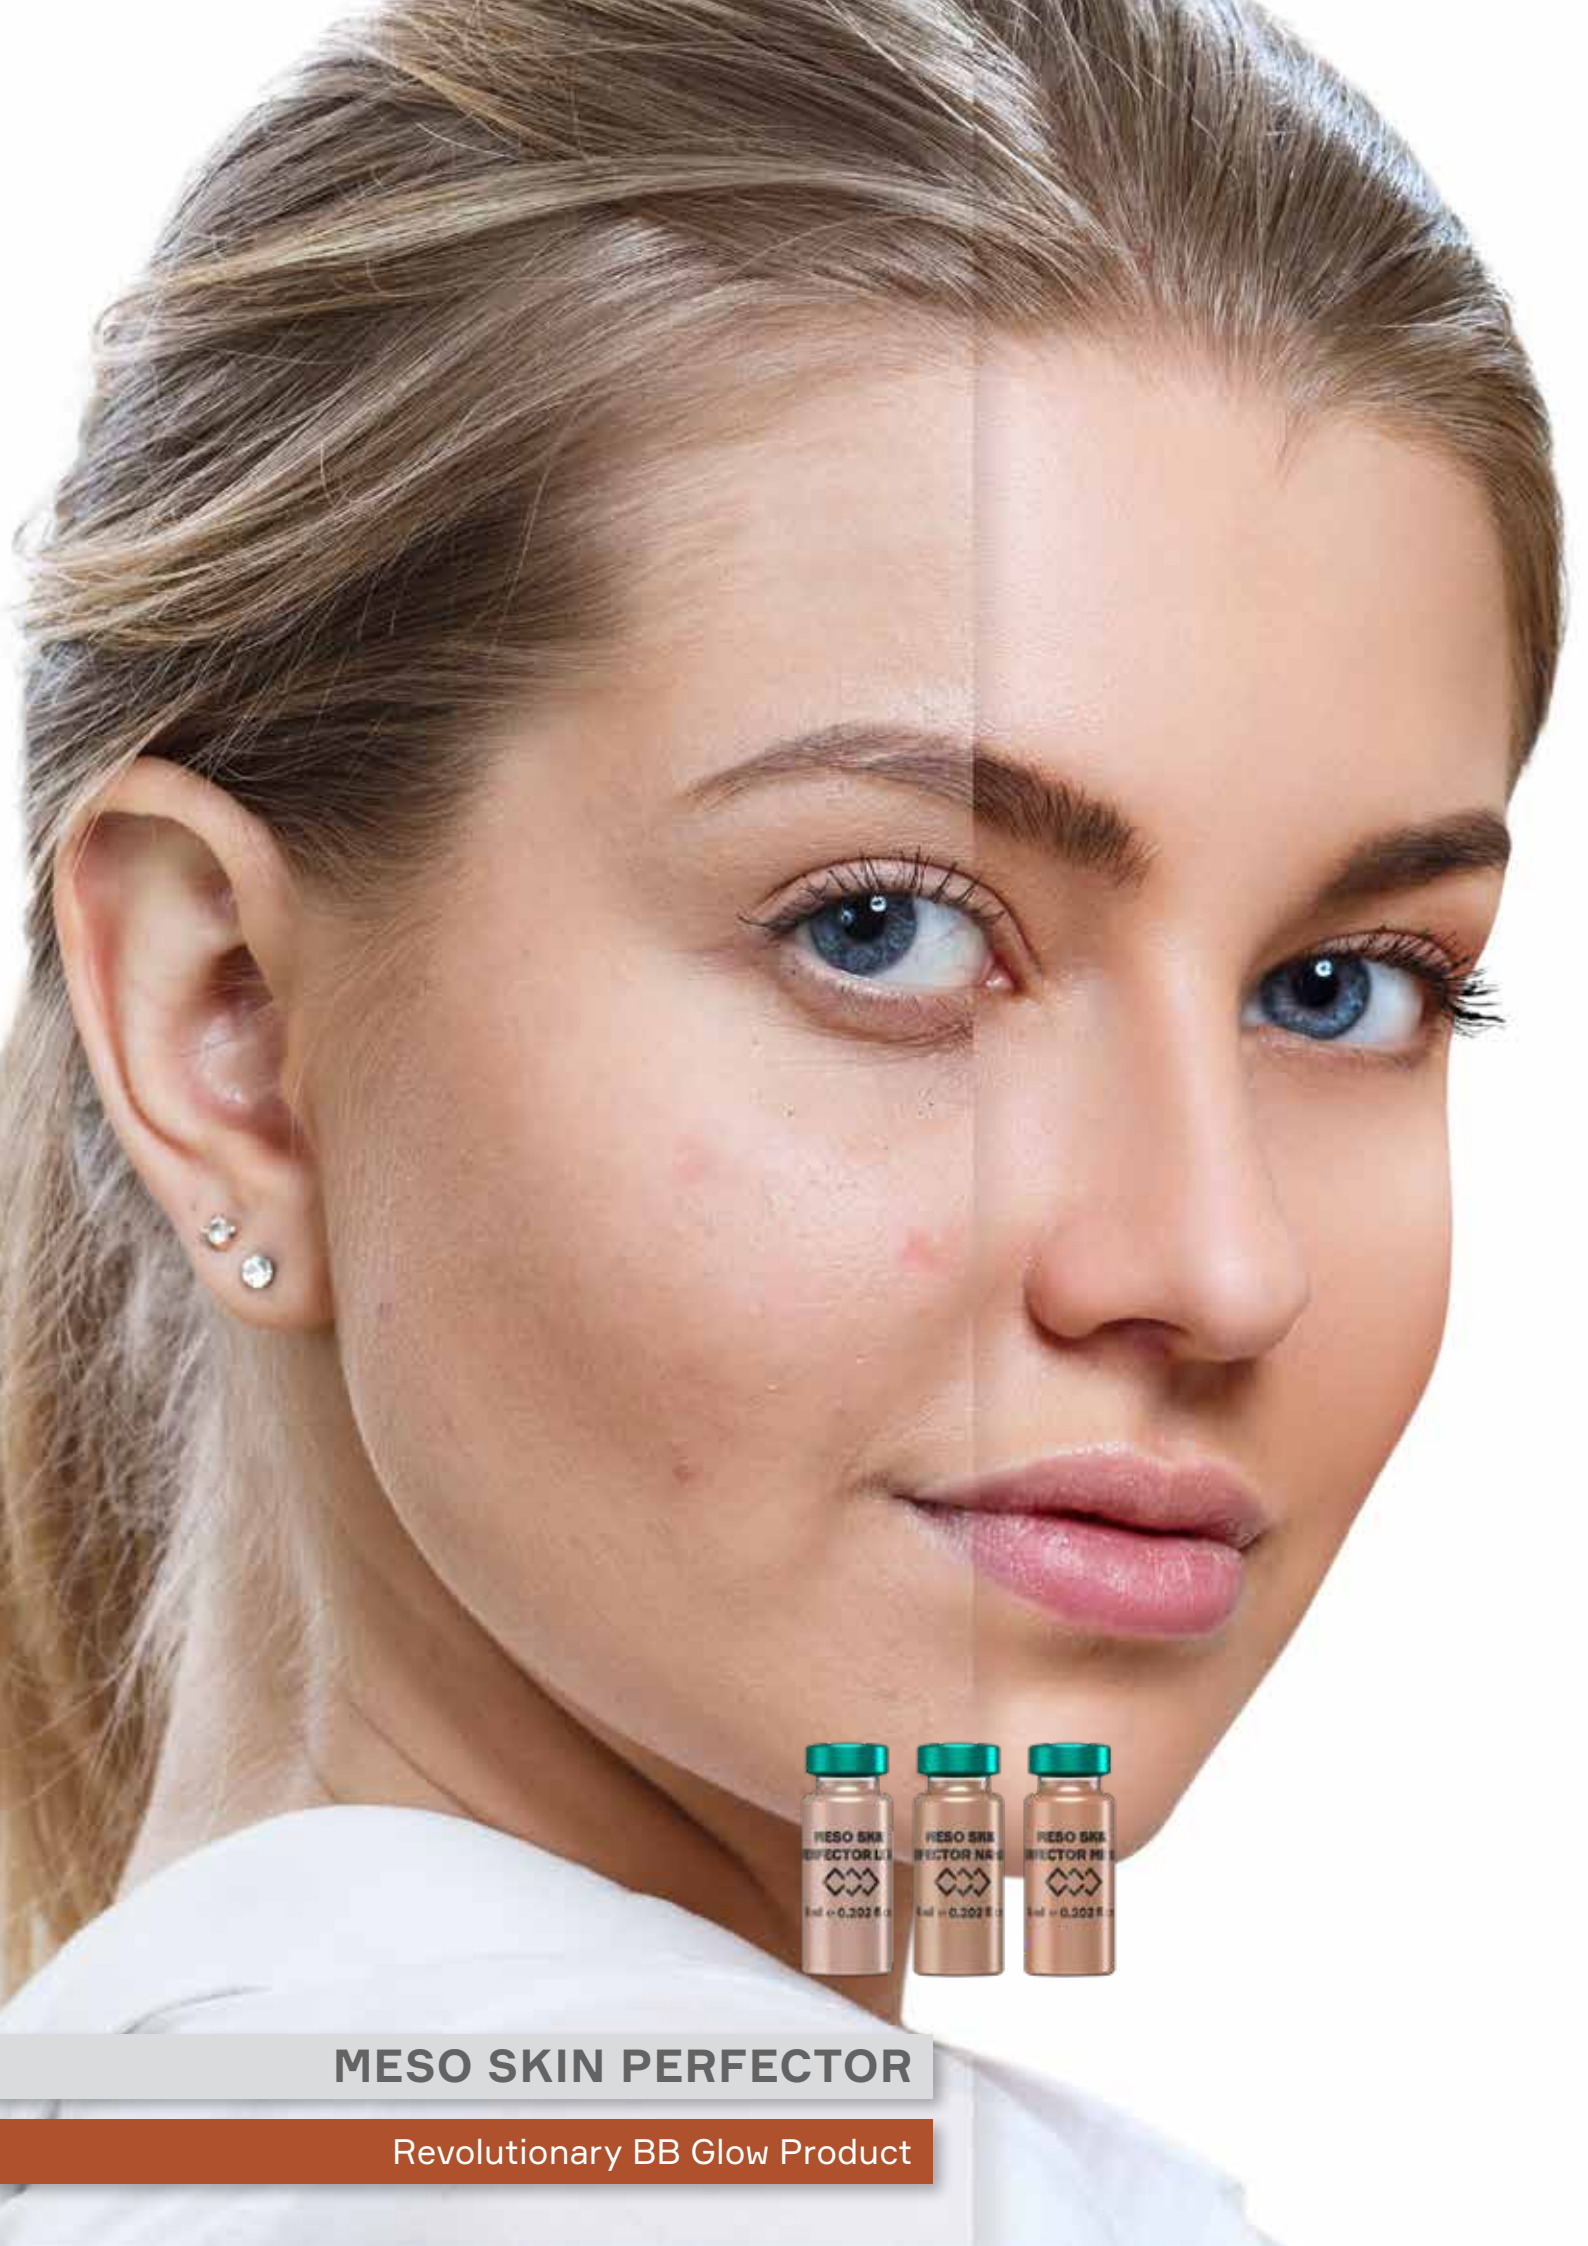

**Aspartic Acid, Panax Ginseng Root Extract, Pyridoxine, Ornithine HCL, Allium Ceba (Onion) Bulb Extract, Arginine HCL, Glucosamine HCL, Citrulline:** These ingredients provide a blend of amino acids, vitamins, and extracts known for their roles in hair growth and scalp health.

**Niacinamide (Vitamin B3):** Improves scalp health and helps in rejuvenating hair.

**Phenylalanine, Valine, Threonine, Histidine, Proline, Isoleucine, Alanine, Serine, Glycine:** Essential amino acids important for hair strength and growth.

**Biotin (Vitamin B7):** Strengthens hair, reduces hair fall, and is vital for healthy hair growth.

This combination of ingredients in MESO HAIR LOSS CONTROL makes it a potent formula aimed at reducing hair loss, stimulating growth, and improving overall hair health.

## MESO SKIN PERFECTOR

Revolutionary BB Glow Product

# Create magic with

## Meso Skin Perfector from Mesoskinline

MESO SKIN PERFECTOR® a revolutionary, hydrating treatment that instantly makes the skin more radiant and gives it the desired glow. The non-invasive product improves skin tone and helps to correct unevenness, small wrinkles, freckles, dark circles under eyes, age spots, enlarged pores and in some cases, even melasma.

It is a concealer that can reduce discolouration on the face and provide a more even complexion.

MESO SKIN PERFECTOR® treats small blemishes, skin ageing, wrinkles, dull complexion, large pores, dark circles under eyes, scars and impurities.

MESO SKIN PERFECTOR® cocktails have an anti-ageing effect and are designed to brighten the face, make it more radiant and soften wrinkles.

MESO SKIN PERFECTOR® treatments can help reduce pigment spots and brighten the skin. They also mask unevenness in impurities and discolouration caused by light exposure (age spots).

MESO SKIN PERFECTOR® not only ensures more even skin tone, but is also a strong anti-ageing product. It acts as an antioxidant and therefore helps dry skin showing signs of ageing that also has a lack of elasticity.

After about 4-5 treatments the results are long-lasting, even for up to 4 months. Suitable for ALL skin types!

### MESO SKIN PERFECTOR® LIGHT

Recommended for people with a very light skin tone/complexion. This skin perfector is used to reduce freckles and colour changes caused by impurities and ageing.

Use this shade like a highlighter for a BB GLOW Meso Contour treatment.

### MESO SKIN PERFECTOR® NATURAL

A medium beige tone with pink undertones, ideal for people with a warm skin tone/complexion.

Use this shade to smooth and accentuate a balanced skin tone in pale skin that tends to appear discoloured.

### MESO SKIN PERFECTOR® MEDIUM

Ideal for tanned skin or people with a more bronze-coloured skin tone.

We recommend it for people with a rather dark complexion. This shade is a darker contour for a Meso Contour face treatment.

## MESO SKIN PERFECTOR®

Revolutionary BB Glow Product

### Main treatment areas

- Face
- Neck
- Décolleté
- Hands

### This treatment benefits

- Smooth, radiant complexion
- Glow effect
- Softens fine lines and wrinkles
- Makes skin more radiant and provides long-lasting moisture
- Effect of a BB cream
- Anti-ageing and lifting effects
- Pores are reduced
- Skin-tightening
- Use of detoxifying ingredients (detox effect)
- Immediate and gradual lightening effect
- Suitable for all skin types (also suitable for Asian and Caucasian types)
- Uniform skin tone
- Promotes the production of collagen
- Neutralises free radicals
- Reduces changes to skin tone
- Lightens scars and impurities
- Conceals dark circles under the eyes with its brightening effect

### TIP

- Either use one shade over the whole treatment area or combine different shades.

### Contents:

- 5 x 6ml vials
- 10 x transparent pipettes
- For 10 treatments
